

Young Women's Career and Mentor Kit (CAMKit) Program.
Exploring careers through mentoring www.camkit.info

CAMKit™ Programs are effective, successful young women's career exploration programs, custom-designed for each client. Our expert educators bring CAMKit programs to schools and youth-serving organizations as out-of-school-time workshops, vacation camps, career days, and 9th grade nontraditional career exploratory courses. We encourage young women to explore a host of STEM-related, traditional, and nontraditional careers through the real-life stories of resilient women (mentors/role models) successfully working in their chosen fields. Mentors work in financially rewarding and personally satisfying careers and are from diverse ethnic and socioeconomic backgrounds. Young women learn about potential career paths by engaging in creative, hands-on activities.

Please follow these links for information that will introduce you to our program. I've attached a story about my Aunt Myrtle, who is the inspiration for this mentoring program, and a sample mentor story card for the carpenter.
